Internship Supply Chain Management

Hewlett Packard is one of the biggest IT providers of the world. ESS (Enterprise Servers & Storage) as owner of the hardware business within HP's Enterprise Business provides server and storage solutions to enterprise customers and midsize businesses. Related to this ESS Supply Chain is responsible for delivering hardware solutions to HP's channel and direct customers across Europe, Middle East and Africa (EMEA).

Within the HP RVC project, HP ESS built up a new factory together with an external manufacturing partner in the Czech Republic. The new factory manufactures the most sophisticated products of HP's offering: high-end data center solutions consist of clusters and standalone complex Configured-To-Order products.

The key deliverables of the internship will be to develop and enhance a toolset of reporting and metrics on a very detailed level. This data will be the basis for partner management activities to drive root cause and corrective actions in order to stabilize and enhance manufacturing processes.

The assignment will require teamwork across multiple functions within HP (procurement, operations management, manufacturing, order fulfillment) and close cooperation with the external manufacturing service provider. The team members of the different functions are located in UK, CZ, US and Germany.

We are looking for students out of the following fields:

Business Administration (preferred with focus on IT), Logistics, Supply Chain Management,

Solid record of past working experience and/or participation in meaningful extra-curricular activities

Experience in reporting is a plus

Proficiency with standard office technology (MS office applications)

Especially very good Excel skills (macro programming, visual basic)

Passion to work in an international team, in a very dynamic and demanding environment

Good team working skills

Advanced English is necessary due to international external and internal contacts

This internship will last 6 months and begin February/March 2012
